

PRATAP GROUP

COMPANY PROFILE

ONE VISION, MANY SOLUTIONS.

From packaging to panels – trusted across industries.

Pratap Group– A Group Company of R.P. Jindal

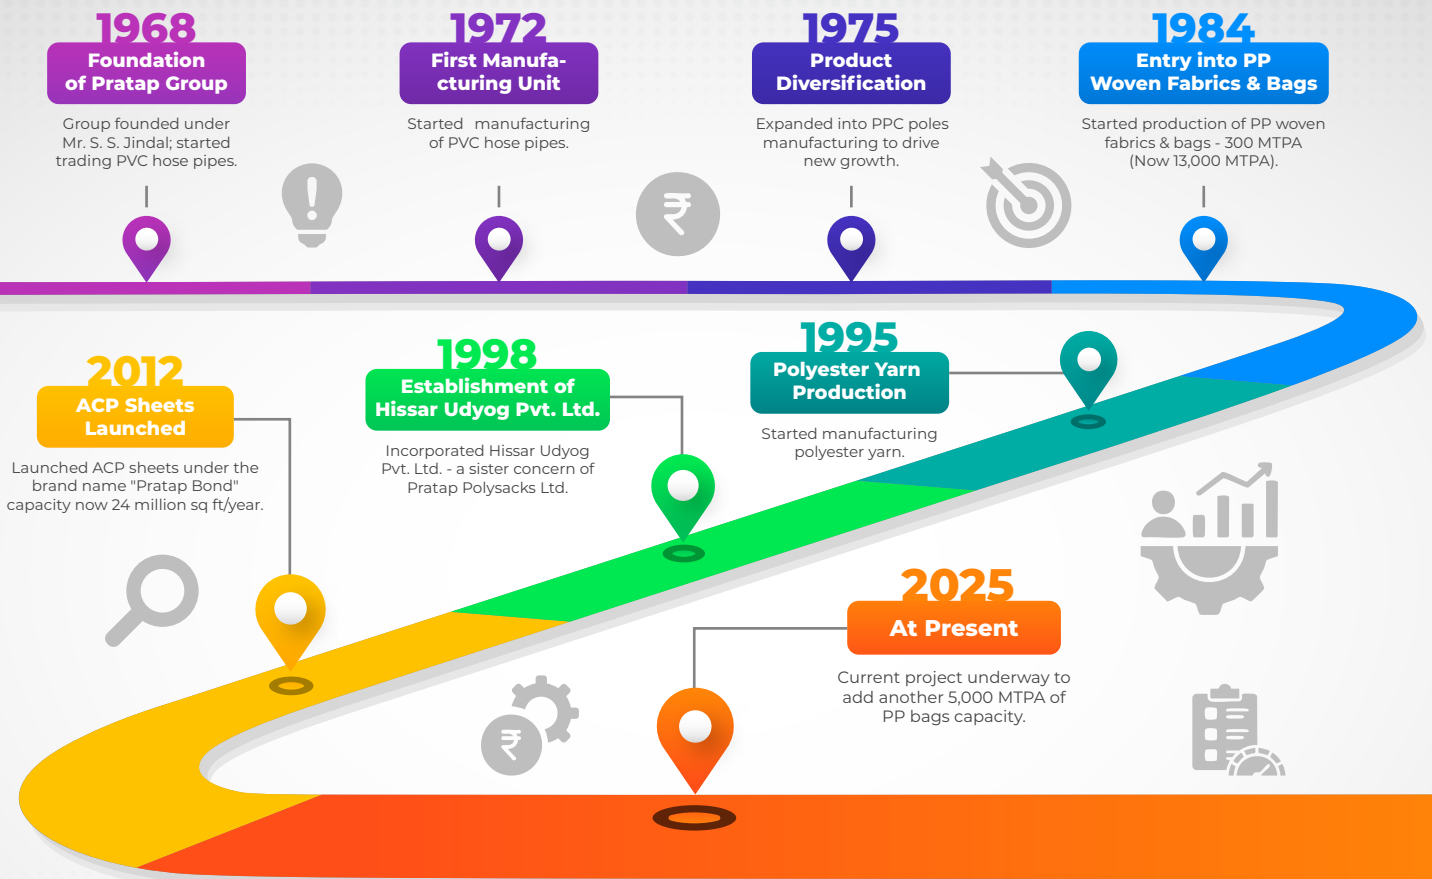

ABOUT US

A leading manufacturer of PP woven fabrics & sacks, Aluminium Composite Panels (ACP) and supplier of PVC laminated sheets in Eastern India.

We provide high quality products and reliable services, embodying our company's commitment to strive for excellence.

Over the years, we've expanded not only our product offerings, but also our general service & manufacturing capabilities.

A LEGACY OF GROWTH

OUR TEAM

Meet the minds behind our progress — Our Board of Directors. Their passion and foresight fuel the success of our company, pushing boundaries and driving growth every day.

Our group founder, he has been the strongest pillar and the ultimate guiding force of Pratap Group, with more than 45+ years of experience. After completing his degree in M Com, LLB and DBM, he ventured into the business. His commitment and leadership has proved to be the key to achieving success. Under his guidance, the group has grown in leaps and bounds.

MR. SHYAM SUNDER JINDAL (CHAIRMAN)

With a colossal experience of 32+ years, he has been playing an eminent role in the overall management of the group, since 1990. He majorly looks after the ACP segment of the group. He also has a good grip on Finance, Marketing and Human Resources Management.

MR. SANJIV JINDAL (MANAGING DIRECTOR)

He has over 27 years of experience in the industry. He is majorly responsible for the polysacks segment of the group. He also looks after the key areas of product development and other technical aspects of the group. He has been an active contributor to the growth of the group, since 1996.

MR. VINEET JINDAL (MANAGING DIRECTOR)

He joined the group in 2018 after completing his graduation from St. Xaviers College, Kolkata. His curiosity and perseverance has helped the group to grow. Currently, he is looking after the day to day operations as well as business development of the group.

MR. AYUSH JINDAL (DIRECTOR)

Joined Pratap Bond as the Head of Marketing. He graduated from BIMM Berlin with a degree in arts. With his creative outlook, he looks to shape the brand image of Pratap Bond to stand out in its field while still being approachable to its consumer base.

MR. DHRUV JINDAL (MARKETING HEAD)

With a degree in Bachelor of Science in Bioengineering from the United States, he brings a strong foundation in optimizing complex systems. Currently overseeing daily production across the plant locations, he ensures operational efficiency and rigorous quality control. Through hands-on management and a data-driven approach, he is committed to continuous improvement, streamlining processes, and consistently exceeding production targets.

MR. KUNAL JINDAL (OPERATIONS EXECUTIVE)

OUR OFFERINGS

PP Woven fabrics and bags

At Pratap Group, we manufacture high quality PP woven bags and fabrics, ensuring durability, tear resistance, and moisture protection. Ideal for grains, cement, and industrial packaging, our products offer strength, reliability, and customization to meet diverse industry needs, providing secure and cost effective storage and transportation solutions.

Aluminium Composite Panel (ACP)

At Pratap Bond, we manufacture premium-quality ACP (Aluminum Composite Panels) known for durability, aesthetics, and versatility. Ideal for exterior and interior applications, our ACPs offer weather resistance, fire safety, and easy maintenance. With a wide range of shades and finishes, we provide innovative cladding solutions for modern architectural excellence.

PVC Laminated Sheet

Pratap Polylam, a brand under Pratap Bond, supplies high-quality PVC laminate sheets designed for stylish and durable interiors. Our laminates offer scratch-resistance, moisture protection, and easy maintenance, making them ideal for furniture, walls, and decor. With diverse designs and superior quality, we provide innovative solutions for modern interiors.

MANUFACTURING PROCESS

Step 1

GRANULES

We source high-quality polypropylene granules as the primary raw material. These ensure durability, strength, and consistency in every bag produced.

EXTRUSION

The granules are melted and extruded into flat tapes. This process creates the base material required for weaving.

Step 2

Step 3

WEAVING

The extruded tapes are woven into strong fabric using advanced looms. This fabric forms the backbone of the PP woven bags, providing high tensile strength.

LAMINATION AND PRINTING

The woven fabric is laminated for moisture resistance and durability. High-quality printing is then applied for precise branding and product details.

Step 4

Step 5

CUTTING

The laminated fabric rolls are cut into required sizes with precision. This step ensures uniformity and accuracy for all bags.

STITCHING

The cut pieces are stitched into bags using industrial machines. Strong seams guarantee load-bearing capacity and long-lasting performance.

Step 6

Step 7

PACKAGING

Finished bags are packed in bundles with care. Proper packaging maintains quality during storage and transportation.

PRATAP POLYSACKS LTD.

PRATAP POLYSACKS LTD.

Pratap Polysacks Ltd is a trusted name in the production of premium PP woven bags in Eastern India. With nearly four decades of expertise in the polymer industry, we specialize in manufacturing and supplying woven sacks designed to ensure the safety of products from damage or spillage. We offer customized one-stop packaging solutions in various sizes and weights to meet your needs. Our operations are backed by cutting-edge infrastructure equipped with modern machinery and equipment, enabling us to deliver superior quality consistently.

OUR PRODUCTS

INDUSTRIES WE SERVE

Our packaging solutions support a wide range of industries including agriculture, sugar, cement, food grains, fertilizers - ensuring strength and efficiency at every stage.

TAILORED TO FIT

Our products can be personalized in size, design, and finish - crafted to align with your exact operational and branding needs.

QUALITY THAT PERFORMS

With high tensile strength, weather resistance, and superior finish, our bags are built to deliver performance and protection.

HUPL
Hissar Udyog Pvt. Ltd.

HISSAR UDYOG PVT LTD.

A leading producer of high-quality PP (polypropylene) woven packaging, Hissar Udyog Pvt Ltd is a sister concern of Pratap Polysacks Ltd. It has been a trusted name since its incorporation in 1998. Over the past 24+ years, HUPL has expanded its offerings to provide comprehensive, made-to-order packaging solutions tailored to the unique needs of different industries. By leveraging our extensive experience, operational proficiency, and state-of-the-art technology, we have built a reputation for consistently delivering high quality products at competitive prices.

OUR MISSION

Our mission is to establish ourselves as Eastern India's best producer of PP woven bags, laminated bags. We want to be known for our dedication to excellence, creativity, and prompt delivery. By combining state-of-the-art technology with a customer-focused mindset, we aim to establish a benchmark in the PP woven packaging industry.

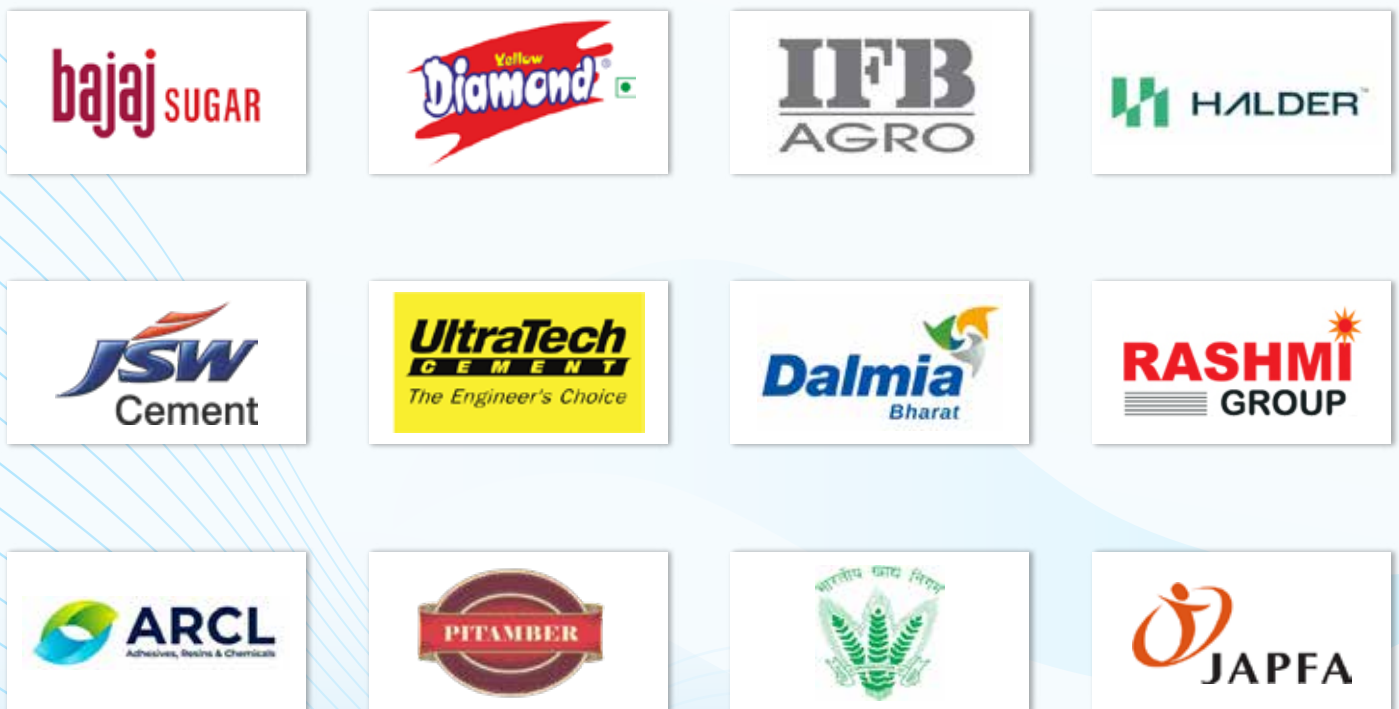

WHY CHOOSE US

With over 50 years of specialized expertise, Pratap Polysacks Limited has become synonymous with quality and dependability in the PP woven and BOPP laminated bag industry. As one of the most respected woven bag manufacturers in Eastern India, Pratap Polysacks Limited brings together deep industry expertise, advanced facilities, and the client-first approach which makes us the preferred partner for businesses seeking reliable and efficient packaging solutions. When you work with us, you choose more than just a supplier – you choose performance, precision, and partnership.

WHAT MAKES US DIFFERENT IS:

- » 100% Fully Integrated Manufacturing Facility
- » In-House Testing
- » On-Time Delivery
- » Client-Centric Customization
- » Customer Service
- » Competitive Pricing
- » Proven Expertise Since 1968

OUR CLIENTS

INFRASTRUCTURE

At Pratap Polysacks Limited, we believe that quality begins at the source and that's why we've built a robust, fully integrated manufacturing ecosystem equipped with world-class machinery.

We have the best quality machines from industry leaders such as Lohia Corp, JP Extrusion, empowering us to manufacture high-performance PP woven bags, laminated bags, and BOPP bags that meet global quality standards.

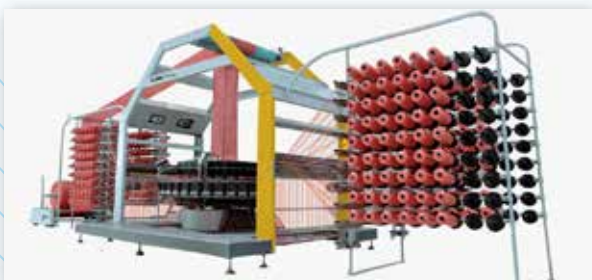

TAPE PLANT

Our tape plant is equipped with advanced models including Lorex 1400 HS and Duotec 120 B, each capable of producing 600 kilograms per hour, and Kabratec 90/400 with a capacity of 400 kilograms per hour. These high-speed extrusion lines ensure exceptional strength, uniformity, and efficiency in every yarn we produce.

WINDERS

Winders are very important for winding and getting the PP tapes ready to be woven into fabric. We have 936 Lohia Corp (CM-V2) winders and 240 Lexon (L200M) winders at Pratap Polysacks. These high-performance machines make sure that the winding goes smoothly and the yarn is of the best quality.

CIRCULAR WEAVING LOOM

With 194 high-speed Lohia circular looms (1100 PPM), we produce strong, consistent fabric from stretched tapes—enabling high-volume, precise output to meet diverse packaging needs. This solidifies our position as a leading PP woven bag manufacturer in Eastern India.

LAMINATION MACHINE

Our lamination unit consists of three high quality machines; they are intended for accurate coating on PP and HDPE woven fabric and bags. They improve moisture resistance and durability, thus are ideal for quality laminated and BOPP bags produced in the market.

PRINTING MACHINE

We have five high quality printing machines, three from JP Extrusion Tech Private Limited and two from Starflex International. We also have a Roto-gravure printing machine from Koley Converting Machinery Pvt Ltd. These machines feature multi-color flexographic printing with a capacity of up to eight colors and a speed of 150 MPM.

CONVERSION LINES

Our factory has 12 state-of-the-art automated lines, and we use the best models from Lohia Corp (Volvomatic 40, BCS Classic, and BCS Liner). These machines can cut and sew with great accuracy and make up to 45 bags per minute.
